PREFACE

Reading, and Phonetics: Manual Alphabet is the fingerspelling version of an early reading and phonetics program. Level 1 introduces the spellings and sounds of single-syllable words. Level 2 expands the vocabulary of single-syllable words, includes words with diphthongs, and provides additional opportunities for transcription.

This text represents level 3 in the series. It extends instruction to include multisyllabic words—an area that often challenges learners who are new to reading, spelling, or English. English unstressed vowel sounds are often reduced or weakened, making them difficult to identify phonetically. Phoneticians transcribe these vowels with a schwa. The schwa has multiple pronunciations. This text is unique in that it defines vowel sounds in unstressed syllables rather than defaulting to the schwa.

Individual learning needs are supported through four parallel workbooks designed for students, parents, and teachers who are new to:

- braille
- manual signing and lipreading
- English language learning
- articulatory phonetics

The articulatory phonetics version contains images of vowel and consonant formations. The manual signing version contains images of each hand sign. The tactile version consists of a visualized text for sighted parents and teachers and a digital text for use with a refreshable braille display. The ELL version contains rules written in formulas with concepts communicated using images. Images are also used to define words in the group exercises and homework assignments.

The resources needed to establish rules and create exercises originated from research developed for the publication of the *Lyric Diction Workbook Series* and the *IPA Scramble* game app by Cheri Montgomery. Computer search functions and her database of more than 87,000 English words were used to organize the spellings of the English language. Words from the database were arranged

in order of frequency of occurrence. The words were placed in a graded order and categorized according to the sounds of the English language as defined by the International Phonetic Alphabet (IPA). A simplified version of the IPA was created for this series. A conversion chart is located on the following page.

This text follows the Moore teaching model. The Moore Method is an interactive approach to instruction designed by Robert Lee Moore, a famous topologist who first used the method at the University of Pennsylvania in 1911. His methodology engages students in the learning process by giving each class member the opportunity to present homework assignments.

Class meetings follow a daily routine. Class begins with each student presenting homework that corresponds with their assigned number(s). Students' written work can be shared using a document camera. The teacher introduces new material in a brief lecture and leads the class in a written and spoken (or sung) group exercise.

Flip this process to double the activities: pass out dry erase boards with markers numbered 1-12. Have each student complete the word list associated with their marker number. Ask students to read and spell the transcriptions. This converts the phonetic exercise into an English reading and spelling exercise.

Grading is simple. Each student begins with a 100 average. Five points would be deducted each time a student fails to present their homework. One or two extra credit opportunities could be offered throughout the grading period so that students could redeem points.

Reading and Phonetics was created to simplify English language learning and make it accessible to students with diverse learning needs. Grading is simplified as well. The recognition of English spellings with accurate pronunciation is assessed through in-class presentations.

INSTRUCTIONAL TOOLS

The International Phonetic Alphabet (IPA) was created by phoneticians for language study. Each symbol stands for one unit of sound. Brackets enclose the symbols and distinguish phonetic content from the spellings of words. This series uses a simplified phonetic system that is accessible to those who sign or read braille. It is also beneficial for those new to English as it uses only uppercase and lowercase letters. Phonetic symbols are signed near the mouth with the uppercase signed phonetic symbols signed in an elevated position. A conversion chart is located on page vi.

Level 3 introduces the spellings and sounds of words with multiple syllables. This is a complex topic for anyone new to reading, spelling, or English. Multisyllabic words have reduced vowel sounds. Vowels in unstressed syllables are often weakened or mixed with other vowel sounds. Since they are difficult to define, phoneticians transcribe them with a schwa. The schwa has multiple pronunciations. This text is unique in that it defines the vowel sounds in unstressed syllables rather than defaulting to the schwa.

The following introduction provides an index to English speech sounds in stressed and unstressed syllables. Phonetic terms are located on pages 7 and 8.

Guide students through the introduction by pronouncing the words. Ensure that students who communicate using the manual alphabet can view your mouth formation. Have students repeat each word after your example. The sounds, accompanying English spellings, and phonetic symbols will be introduced incrementally throughout the text – the introduction simply exposes students to the sounds of the language. They may refer back to this section for a review of the phonetic symbols and sounds.

The format of the exercises within allows all students to be engaged in the learning process. Encourage them (by example) to enjoy the language by singing the words.

Singing is an excellent way to explore the sounds of a language. Singing slows down the articulatory process and gives the voice time to clarify the sounds. Model singing by intoning the words. There are always students who would love to join in and share their beautiful voices with the class.

The first class meeting is unique in that it is teacher-led. Students lead class for all units that follow. A daily routine is recommended:

1. Have students present a uniquely assigned word list in front of the class (word lists are numbered 1-12). They may speak or sing their word list. Use a document camera to share the students' phonetic transcriptions. The class should observe the presentations and use the workbook to transcribe their classmates' word lists.
2. Introduce new rules in a brief lecture.
3. Lead the class in a group transcription exercise. An answer key is on page 137.

This workbook was designed for those learning the manual alphabet. The signed phonetic spellings of words from the group and individual assignments are depicted. Students are encouraged to sign the spellings and phonetic symbols of each word.

ADDITIONAL ACTIVITIES

Phonetic exercises facilitate multiple group-engaging activities. Word lists can be distributed as board work. The students can then read the board work and provide English spellings. This flips the activity into a spelling challenge. Do not correct the board work. Encourage students to read the words as they are transcribed and allow them point out errors as they are identified.

This series was designed to help students enjoy the sounds of the English language. They will quickly discover that homework assignments are reminiscent of word games. Once they learn the sounds and associated symbols, they will be ready to play word games such as IPA Scramble. Playing cards are available at www.teamphontics.com.
